DENTAL SURGEON
In Champion Thursday
and Friday.

School Health Clinic

Under auspices of the Cham-
pion Women's Institute, a
school clinic will be held in the
basement of the public school
the last week in May. Definite
dates for the medical examina-
tion of the children of the
various grades will be an-
nounced later. Dr. Frazer re-
quests that, where possible at
all parents be present at the
examination of their children,
that they may consult with him
regarding any defects.
All mothers and fathers want
their boys and girls to be as
healthy as they can possibly
be. The doctor goes over each
child in order to find out
whether any physical defect is
harming him and making it
hard for him to get on in school
or to be happy in his work and
play. Because you know your
own child so well, you can per-
haps help the doctor in making
his examination and the doctor
can help you by telling you
what only his trained ears and
fingers and his delicate instru-
ments discover.
The Institute hopes for the
co-operation of the parents of
the community in making this
clinic one of real benefit to the
children. Watch the paper for
further announcements.

Institute Notes for May

At this meeting we heard
about the preparations for the
School Clinic to be held the last
week in May. It was decided
to have a Bake Sale and Tea on
Saturday, May 19. Mrs. Bauser
will convene this, and
members, attendance! Please
consider yourselves canvassed
for this and bring or send all
you can. It will be in the same
old stand on Broadway.

Mrs. Stephenson then took
charge of the meeting and pre-
sented the most delightful pro-
gram as follows:

Recitation by Fern Davis—
Kitty's Tea Party.

Chorus, four little girls—
Little Boy Blue.

Recitation, Phyllis Chamber-
lain—If I should never marry.

Solo, Dora Miller with accom-
paniment of piano and violin.

Chorus, four little girls—
Naughty Doll.

Violin Solo, Helen Higgins.

Miss Lena Stephenson trained
and practised with these young
artists who were certainly a
credit to her. They were all
letter perfect and looked just
like.

Miss Dora Miller is a much
sweeter singer than Virginia
Phair, the songstress of the
Pinks, and the young violinist
is also worthy of a place in the
Hall of Fame, while Lena at
the piano was equally good.

The president treated the
performers to ice cream and it
was all over.

The June meeting has been
kindly invited to Mrs. McLean's.

Friends of Miss Freda Bastin
will be interested to know that
she has resumed her work, having
been successful in passing the
required examinations at the
completion of a four month
period of probation in the Van-
couver General hospital.

This district is in need of
immediate rainfall. Early
sowing grain is appearing patchy
due to lack of moisture for
germinating seed. The cool
weather of the past few days
has helped the situation con-
siderably. Soil drifting was
causing considerable damage.
Grasshoppers are hatching west
of town.

Old Time Concert Big Success

The concert, sponsored by the
Champion Ladies' Aid last Fri-
day evening, was one of the
most successful events of the
year. Campbell's Hall was
packed to capacity and the ap-
plause and later comment test-
ified to the excellence of the
program. Highest praise is due
to all the artists taking part,
and the Ladies' Aid is to be
commended for giving the citi-
zens of this community the
opportunity of learning what
fine local talent we have.

Special mention should be
made of the play "Babe". The
audience could almost smell the
terrible rat poison concocted by
George Whipple (Ray Johan-
son) and it is certain that Peter
Spencer (Franklin Cool), the
rich uncle could. The latter's
attempt to make love, with a
poison poke on his face, to Mrs.
Fenby, was a scream. The
latter part was admirably taken
by Mrs. Bastin. Miss Molly
Bastin is the role of Mrs. Mary
Whipple was quite successful in
maintaining the rich uncle's
good humor by her charming
smiles.

Several outsiders contributed
very excellent numbers on the
program. Among these, special
mention should be made of the
pupils of Blusson School under
the leadership of Miss Blusson,
Campbell, and Miss Hartwig.
The latter part was admirably
taken by Mrs. Bastin. Miss Molly
Bastin is the role of Mrs. Mary
Whipple was quite successful in
maintaining the rich uncle's
good humor by her charming
smiles.

The program was as follows:
Oh Canada.
Selection—High School Orchestra.
Piano Solo—Miss Blusson Campbell.
Vocal Solo—Miss Barbara Wise.
Vocal Solo—Miss Gladys Rhodes.
Chorus—Blusson School.
Vocal Solo—Mr. William Walker.
Vocal Solo—Miss Marie Moffatt.
Piano Solo—Miss Margaret Patter-
son.

Duet—Mr. Campbell and Mr. Daw-
son.

Selection—High School Orchestra.
Play—"Babe".

Dance Number—Miss Marge Mc-
Donough.

Vocal Solo—Mrs. McLean.

Trio—Misses Ada Williamson, Ruth
and Gladys Anderson.

Quartet—Harold and Don Steph-
enson, Jim McNaughton and Don
Campbell.

Vocal Solo—Mr. Dawson.

Violin Solo—Miss Gladys Rhodes.

Vocal Solo—Miss Hartwig.

Vocal Solo—Mr. Marchman.

God Save the King.

F. Clever wishes to thank his
many friends for kindnesses
extended to him during his
stay in the Vulcan hospital, also
to the Royal Purple and Mr.
and Mrs. V. S. Jopling for the
beautiful bouquets of flowers.

Miss Williams who is leaving
shortly for England is holding
an auction sale of her house
hold goods in Champion on
Saturday night May 12, on
lots between Chronicle office
and Farmer's hardware, Sale
commences at 7.30. Art. Hop-
kins Auctioneer.

Several permanents were
given Wednesday when Mr.
and Mrs. J. Tuftland of Leth-
bridge were in town. They
will be in Champion again
during the first week in June,
and anyone interested in a
permanent at that time, may
get full particulars from Mrs.
W. A. McIntyre.

Rev. P. Dawson motored to
Calgary this week taking his
mother and family. During his
absence the interior of the
parsonage is being painted and
kalembined by D. M. Elliot.

Simpler Problems Baffle Man

While world opinion is disturbed and distorted by threats of war and general unrest, while thoughts of budgetary deficits and problems of trade engage anxious minds at home, it is interesting to turn to conquests of the physical universe which, from time to time, demonstrate man's ability to master infinitely greater problems than those which threaten his peace, security and prosperity. The statement may be true and commonplace, but it is nonetheless true, that man's ingenuity in solving the riddles of the universe is in marked contrast with his apparent stupidity and futility in seeking solutions of others directly within his own purview and which, as a matter of fact, are his own creation.

The thought is suggested by recent addition to scientific knowledge of the atmosphere which is now known to consist of four layers—the troposphere, the stratosphere, the mesosphere and the ionosphere. The troposphere, the layer closest to earth's surface, is the stratum of changing temperatures and pressures and of wind-driven clouds. As long ago as 1869, it was discovered, by temperature tests, that this layer terminated relatively abruptly at a height of between six and seven miles. Beyond this height, the temperature was found to be uniformly constant up to about 23 miles. This layer of calm, cloudless air of uniform temperature is the stratosphere of comparatively recent conquest by balloon ascension.

As this is written, a prairie dust storm occludes the sun, and, as a result, there is a marked fall in temperature. It is palpably correct, it happens that calculations concerning dust shot into the stratosphere by volcanoes prove similar cooling effects. If one seven-hundredth of a cubic mile of fine dust were blown into the atmosphere it could form a screen which would reduce the intensity of the sun's rays by 20 per cent. The screen would remain suspended in that still windless zone for years, and it has been suggested that the ice ages have been caused by such volcanic disasters.

Recent research has shown that, above 23 miles and extending up to 38 miles, is another layer rich in ozone and, for that reason, called the ozoneosphere. The significance of this layer so far as human history is concerned, lies in the fact that, because it is absorptive of ultra-violet rays from the sun, the earth is adapted to human habitation. Without this screen, it is said, organic life on earth would be wiped out by sun-stroke.

The ozoneosphere, unlike the stratosphere, is not cold but hot. Above it and beginning at 50 miles, lies another layer, the ionosphere, so-called because the gasses of the air in that region are in an electrically excited or ionized state. The secrets of this stratum are yielding to radio research although its existence had been deduced from the electrical conductivity to explain some of the earth's magnetic phenomena. The ionized particles have the property of reflecting radio waves back to earth and it has been revealed there are two main layers in the ionosphere, at 64 and 112 miles respectively, which reflect these waves. Each of these is split into two during the daytime making a total of four layers. These four layers probably mark the heights at which particular constituents of the atmosphere become electrified or ionized.

Recent research has further demonstrated that the electrification in the layers is more intense in summer than in winter, the condition being normally due to ultra-violet rays from the sun. Thunderstorms also play their part, it having been calculated that the electrical energy constantly released in thunderstorms is more than sufficient to produce all the observed ionization in the ionosphere.

That scientific minds applied to investigation of the seemingly inaccessible have produced so much positive achievement is in striking contrast with the meagre fruits of the efforts of politicians, statesmen, economists and "brain trusts" to solve the problems of man's social and economic relationships. It suggests the thought, that we were scientifically trained minds set freely and independently to work, by universal agreement, upon problems which seem destined to perpetuate embittered hatreds between peoples of kindred cultures and similar aspirations, their solution quickly would be forthcoming. The rest would be up to us.

FINE QUALITY TEA
ALWAYS ECONOMICAL

Pickers of the finest teas such as "Balada" have been forced to increase prices. As soon as merchants' stocks at present low prices are exhausted, your favourite beverage will cost you slightly more. This has been brought about by advances at the gardens where production has been purposely restricted in order to save the growers from further disastrous loss. But this comforting beverage still the cheapest drink in the world next to water itself.

Charting Coast Of Labrador

British Naval Surveying Ship Challenger Engaged In Work

The British naval surveying ship Challenger, has sailed from Portsmouth to resume her task of charting the coast of Labrador. This work has never been completed. Last year the admiralty started the Challenger upon the work because it has become necessary to provide safe channels for navigation along this dangerous coast owing to the development of Labrador. The survey will take years to complete.

A new type of plane with folding wings may be stored in a small space.

Weary Days—Sleepless Nights
Wrack the Nervous System

Men and women too night after night in sleepless beds, their eyes do not close in refreshing slumber that comes to those whose nerves are strong. They are tired and nervous, weak and worn out, and everything looks dark and gloomy.

Milburn's H. & N. Pills is the remedy that is required to restore them to the blessing of good health. They bring back the sound refreshing sleep, tone up the nerves, and impart that sense of buoyancy to the spirit that is the result of renewed mental and physical vigor.

Deep Sea Exploration

Diver Will Spend Six Months Studying Fish In Ocean's Depths

Even though he plans to drop 3,000 feet down into the depths of the ocean in a diving glove, William Beebe doesn't expect any sea sickness.

"I saw one once," he said, a grin wrinkling his weathered face. "Then I took a second look. At first glance, it was a trencher," as was supposed withering away into the horizon. It turned out to be the Atlantic cable." Mr. Beebe was making last preparations for his departure for St. George, Bermuda, where he will spend six months studying deep sea fish and the strange, weird lives they lead.

CAST OFF UGLY FAT

Woman Loses 28 lbs. in 3 Months

"Three months ago," a woman writes, "I was persuaded to try Kruschen salts to reduce my weight. In three weeks I lost 8 lbs., and I felt five years younger. I really must say I feel a different woman now. I have now lost 28 lbs. (Mrs. J. S. B.)

Kruschen salts take one half-teaspoonful of Kruschen salts in a glass of hot water before breakfast every morning. There will be no rapid or alarming loss of weight, but just a steady decrease that baby fat which is as unhealthy as it is ugly. Kruschen is a scientific and safe method of getting rid of the waters of those European spas that have taught a lesson to the over-eat people to reduce weight.

Got Post War Job

Shoved One-Armed Man Who Did Great Things For England

The story of the late Lord Young, minister of health, who lost an arm in the post-war on Zeppelins, got a post-war job with the admiralty was told by Lord Riddell. Sir Edward, Lord Riddell said, came back from active service and sought a position with the admiralty only to be told there was "no room for a one-armed man."

Sir Edward, he said, retorted: "Well, come with me to Trafalgar Square and I'll show you a one-armed man who did great things for England."

That, concluded Lord Riddell, was too much, "even for the admiralty," and one of his chiefs replied: "If you are another Nelson we will take you on."

When the farmer prospers, all the world is prosperous. That, however, is a fact which too few people and too few governments have learned to appreciate.

Under the new Rights-of-Way Act in England tens of thousands of footpaths have been given the status of highways.

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

NO. 15.—CONSERVATION OF THE EYESIGHT

A world of beauty, emotion and color is revealed to us as well as a lack of proper eye care. It is in a large measure responsible for much needless suffering and inefficiency. Many people live to middle life before discovering that the vision of the two eyes is not the same. This condition of course puts too much strain on the better eye and the poorer one gradually gets worse from lack of use.

So many people are inclined to think their eyes are normal because they "see alright." Apart from the fact of whether or not both eyes have equal vision, the vision of the two eyes is not the same. This condition of course puts too much strain on the better eye and the poorer one gradually gets worse from lack of use.

Russian Aviators Have

Completed Big Task
Rescued 161 People From Floating Ice Off Siberian Coast

Two months ago 161 Russians were wrecked on floating ice between Wrangel Island and the coast of Siberia. Since that time the efforts of Russian aviators in "rescuing" and a few at a time has held the interest and admiration of the world. The task was recently completed. Not a life was lost.

Moscow, aware of the rich mineral resources of this Arctic island whose inaccessibility has become proverbial, had determined to populate it with permanent colonists. Of the 161 there were ten women and two children. After their ship had been crushed by the ice, the aviators, who had planes of food and fuel, just flew to the quarters on the ice and were not uncomfortable in spite of the sub-zero temperatures. They suffered little, but they were constantly in peril for the freezing up of the ice was bringing death at any moment.

The organization of the relief work was thorough and systematic, and its success is due both to the skill and to the indomitable courage of the Russian aviators. It is not without reason that Moscow is celebrating, and praising the efficiency of Soviet organization, the hardihood of the marooned men and women, and the devotion and ability of the rescuers. Our Moscow newspaper comments, perhaps with reason, that if the disaster had occurred in the days of the czar, the Wrangel colonists would all have perished while bureaucratic officials argued as to which department should undertake the rescue.—Cleveland Plain Dealer.

Light Clothes For Warmth

Several Layers Better Than Small Number Of Heavy Ones

Very thick, heavy garments are not so helpful in enabling one to keep warm as have been supposed. A better way to reduce the cold is to wear a larger number of light ones. The late Lord Kelvin was a great authority on this method. On one occasion when he was making test of his sounding machine on a battleship on a bitterly cold day, he asked why he did not wear a thicker reply was that he did not need one. The colder the weather, the more thin underclothes he wore, and the air between them insulated his body from the freezing wind. Many fishermen have also found that several layers of light garments are more useful than a small number of heavier ones, and act accordingly when facing the intense cold frequently encountered on their winter fishing trips.

Canada's Bill For Education

Public Expenditure Of About One Hundred And Sixty-Five Million Annually

Public expenditure on education in Canada amounts to \$66.5 million annually. Every student attending school. A recent report issued by the Canadian government shows that education incurs a public expenditure of about \$165,000,000 yearly.

Education in Canada is under the control of the provinces. It is the task of instructing the Indians who are wards of the Dominion government. The provincial governments have made ample provision for primary, secondary, and higher education. In each province there is a complete system of public and high schools, aided by the government, with liberal grants, while in each province there is also one or more universities. In addition to the provision for arts and science, there are faculties of medicine, law, and dentistry. Technical schools and agricultural colleges, where, those who desire to specialize along these lines may have an opportunity to fit themselves for life work, are found in every province.

In 1932 there were 32,901 educational institutions in Canada, employing 58,212 teachers and attended by 2,503,746 pupils, about 25 per cent of the whole population.

Where Talent Is Developed

Individuality Of Members Brought Out In English Institutes

People talk of the equality of mankind, yet nothing is so absurd as the equality of mankind, declared Mrs. J. C. Douglas, president of the South-English Institute, when she was entertained in Edmonton.

"It is the inequality of mankind that is the destructive and all-important factor in human affairs," Mrs. Douglas went on. "This is particularly noticeable in our English language, where diversity is the very essence of our unity."

"Immediately a member enters the door he becomes a member of the Institute and nothing more. The character of the member has nothing to do with his background, and for this very reason the hundreds of men are discovering themselves to have undreamed-of talents. Every member does something different. Each is encouraged to develop his own individuality, and herein lies the success of the movement."

Finally, "The new ideal of the factory is an old-fashioned man. I think."

"Oh yes," He's an old-fashioned man, he'll be taking the bolts from the drive wheels and replacing them with superchargers."

Husband: "Why did that woman keep you standing at the door for half an hour?"

Wife: "She said she hadn't time to come in."

As a matter of fact, your neighbor thinks you are as disagreeable a thing about you as you do about them.

Canadian macaroni and vermicelli last year made an entrance into the land for the first time.

Seems Hard To Solve

Perhaps there ought to be a happy medium between the methods of young scientific students of babies and the methods of their grandmothers. A Baltimore specialist on babies, the modern method, leaves babies too much alone. It is curious that after several hundred thousand years' experience the human race has not come to definite conclusions as to how babies should be brought up.

Too Much "Party"
Last Night

Too Much Food, Late Hours, Smoky Atmosphere

YET—This Morning No "Acid Headache"—No Upset Stomach

Scientists say this is the QUICK-EST, BEST and EASIEST way to get rid of ACID FEELING—the EFFECTS of over-indulgence—the most common ailment known to science. Just do this:

"Lips' Milk of Magnesia in a glass of water BEFORE the morning meal take 2 more tablespoonfuls with the juice of a WHOLE ORANGE. That's all! You'll feel great!"

Or take the equivalent amount of Phillips' "Milk of Magnesia." Each tablet is equal to a teaspoonful of liquid.

Get genuine Phillips' "Milk of Magnesia" in the familiar form of the new, marvellously convenient, tablets. Be sure it's PHILLIPS'—the kind doctors endorse.

In Memorium

In loving memory of Norman Alois who passed away May 8th, 1931.

We miss him and mourn him in silence unseen.

And dwell on the memories of days that have been.

His parents, brothers and sisters.

Strayed

On the Goodnight farm south of Champion a red milk cow and calf See Louis Garry living on farm now.

House for Rent

Now... Instant-Gas Cooking for Homes Beyond the Gas Mains

JUST light a match, turn a valve... your new Coleman Instant-Gas lights instantly... right at the burner! It has no preheater. No waiting. Put on your pots and pans and start cooking "right now". That's modern gas service! The finest stove you ever saw for homes out beyond the gas mains. Economical to operate... makes and burns its own gas from regular untreated motor fuel.

Your dealer will be glad to show you all the many new, modern, up-to-the-minute improvements on these handy new stoves. There's a model just "made to order" for your cooking requirements... at a price that will fit your purse. Let him demonstrate the new Coleman Instant-Gas. See for yourself what a stove it is!
